

the Magic of Healing

*with Christian Toren von Lähr
and Chris Valentine*

A healing *Spectacular* with lights, colors, vivid special effects and audience participation.

The command of Restorative Healing was in you before your very first life – join us as we unlock this lost secret to picture-perfect health. See for yourself, it's eye's-open magic.

There will be Fairies, Leprechauns, Gnomes and
Elves in attendance, be prepared.

In the beginning there was THE REAL YOU.

It was from this spiritual Blueprint that you were made - and remade, into your Physical form(s) throughout reincarnation. That blueprint was Ætheric, a form of energy – and this grid-like design is still an available expression through your Chakras. It is the means by which you are physically created. This template remains after Creation itself and is the design guide for subsequent perfect health. At the Dawn of the Crusades, we lost our Right, our knowledge, of inherent magic. LET'S RE-LEARN!

Eons afore science and medicine ever existed there were survivability powers within us; they were the means to use the Blueprint, our inherent template. One of these was the proclivity for restorative health. This historical timing is also interesting because quite frankly, this is our actual connection to Nature People. Esoterically we already know of them as “*the builders*,” but they build more than the elements and minerals, *they build you!*

Their intrinsic Ætheric composition allows them to build intelligent templates, which is how they draw matter together to construct the minerals. Liken this to Dad putting together the Christmas bicycle by following the illustrative guide. It's time to wake up ...this is precisely how you come to take physical form too. AND, this is why Nature People are drawn to us, they would like to check-up on their handy work.

In our little presentation we are going to present you with some experiences that will give you eye's-open insight to this template. You will be able to correlate this panoply to your current life.
